

The Environmental Committee

As citizens of the world we must protect our planet from the physical, economic and public health effects of climate change while also providing pathways to economic prosperity.

The Environmental Committee is committed to broader environmental issues that face our community, state, country and world. Areas of focus for this committee are:

- Studying the potential for a plastic bag restriction policy for Estes Park.
- Working with the Program Committee to bring speakers and awareness to the Estes Valley on the impact of climate change on our community and National Park.
- Advocating for business growth that has a positive impact on the environment.
- Following public policy and advocating for policies that positively impact the environment (advocating for 100% renewable policy, advocating for signing on to the Climate Change Mayors agreement, etc.).
- Partnering with other organizations with similar positions on the League's position on the environment.
- Future projects that have a positive impact on the environment.

The committee is separate from the League of Women Voters and Community Recycling Committee (LWV/CRC) as the LWV/CRC is specifically focused on recycling efforts within the Estes Valley.
